13-4 Alliance Blvd, Suite 454
Barrie, ON L4M 7G3

Specifications

- Transceiver 915 MHz, 25 channel Spread Spectrum, AES encrypted, 0.10 watt
- RF Range: up to 2,000 open air between panel and MotionViewers
- Battery Life: up to 4 years on Control Panel and MotionViewers
- Detection/Illumination: up to 40 feet
- IP65 weatherproof rating on MotionViewers
- Operating temperature: -20F to +140F (-33C to +70C)

Information - Pro

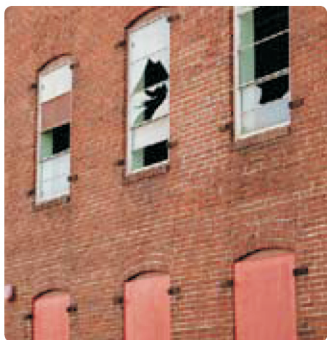

Portable Remote Sentries
where you need them.

CAMERA

Motion Sensor

Illuminators

The monitoring laptop's integrated cell modem receives the video alerts of the incident sent by the control panel for immediate review by the agent. The 10 second video alerts provide immediate situational awareness to determine appropriate response.

UNPLUGGED totally wireless
video security The system has a wireless control panel that can control up to 20 remote outdoor MotionViewers. The control panel's integrated cell modem sends video alerts of the intruder over the cell network to the receiver unit for review.

The system is armed/disarmed using a keypad or the RF Remote Control.

The Stakeout-Pro

comes in a custom military-style weatherproof case that can be carried on a plane as hand-luggage. Simple and fast deployment makes Stakeout-Pro the perfect remote sentry for mobile security details.

Standard kit includes

- 1 monitoring laptop/software/integrated cell modem
- 1 control panel with integrated cell modem
- 3 outdoor MotionViewers and mounts
- 1 Remote Control
- 1 keypad
- Optional: additional MotionViewers, Outdoor Siren/Strobe

Force Multiplier In A Box

The Videofied Stakeout-Pro is a wireless portable remote sentry video system that can be instantly deployed as needed and moved as situations evolve. Wireless MotionViewers use sophisticated PIR technology to trigger the integrated night vision camera and capture a 10 second clip of the incident. The system immediately sends the video alert over the cell network to the portable monitoring laptop for review. The Stakeout-Pro allows a single person to monitor multiple entry and exit points from a single location anywhere there is cell coverage.

The MotionViewer™ is designed to operate in harsh outdoor environments from -20F to +140F. It is entirely battery powered and can deliver up to 3,000 video clips on a single set of batteries. The sophisticated PIR/camera illuminators act as remote sentries that can be instantly deployed and moved as needed. Adjustable mounting brackets attach to the threaded socket on the rear.
